BOOK DONATION DRIVE

As supporting education is one of our motto, many organisations and people donate wastepapers so that we can do notebook donations to our affiliated underprivileged schools as well as schools which teach and nurture neurodivergent children. It is our dream to be able to support as many children as possible in their education and our book donation drive is a testament to our pledge.

Join Little Leaf in making a tangible difference: where waste becomes wisdom, and every little leaf turns into a lesson for life.

Supporting Education**

WHO WE ARE

Little Leaf
Turning Paper into Hope

Founded on 2nd October 2014, Little leaf has been a beacon of hope for small children for over 10 years. In a world where haphazard and unmindful waste disposal often overshadows its recycling potential, Little Leaf stands as an instrument of positive change. Little Leaf, a non-profit organisation takes an innovative, compassionate and sustainable approach to recycling by transforming discarded paper into brand new notebooks. Little Leaf's mission goes beyond environmental responsibility; it is rooted in a deeper purpose – supporting education for underprivileged children.

OUR VISION

Guided by our motto, "Promoting Recycling, Supporting Education," we merge sustainability with social impact. Every contribution, every piece of recycled paper, and every notebook shared brings us one step closer to a better world where environmental consciousness and educational equality walk hand in hand. To encourage this, we aim to collect waste papers from many cities in India and abroad and recycle them into notebooks or reusable paper, thus supporting education and promoting recycling on a national and international level and to encourage local communities into using recycled paper and be a part of the worldwide sustainability movement.

WHAT WE DO!

- Once your waste paper is ready for pickup, we arrange a free pickup from your home, school or office to collect the waste paper.
- We collect all kinds of waste paper, like newspaper, records, bills, craft paper, cardboard boxes, cartons, airplane boarding pass, paper packaging etc.
- We also provide bags for storing this waste paper in your organisational premises.
- We believe in keeping the confidentiality of documents and hence all paper that is collected is recycled directly without the involvement of any third party for sorting. We also provide shredder facility to offices for special documents. We can also provide confidentiality and pulping documents if required.
- This recycled paper is converted into notebooks which is given back to you for personal use or donating. We can also give back writing paper or printer copy paper to organisations.

RECYCLE WITH US

Currently present in Pune and Varanasi, and soon expanding to other cities in India, Little Leaf invites you to start your recycling journey with us!

OUR MISSION

Little Leaf ensures that waste is given a second life and waste paper is recycled into notebooks. . These notebooks are then distributed to children in need, empowering them with the tools to learn, grow and dream. Each notebook handed out represents more than just paper; it symbolises opportunity, hope and a brighter future.

OUR POLICY

- We at Little leaf follow all policies, rules and regulations laid down by the government pertaining to collection and safe disposal of all waste collected.
- We follow all the necessary government compliances for the security and well being of workers engaged in the activity of collection and disposal of waste.
- We follow all safety protocols for any hazardous waste collected.
- We follow the policy of transparency in all our systems for all stakeholders and associates.
